

The diagram illustrates the information structure for a speaker. At the top, the text "Speaker 1" is displayed. Below it, "Institution 1" is shown. A horizontal line separates these from the conference information below. On the line, there are two boxes labeled "A" and "B". Below the line, the text "Conference Name" and "Institution" are listed on the left, and "Conference Dates" is listed on the right, next to a box labeled "C".

The diagram illustrates the information structure for Speaker 2. At the top, the text "Speaker 2" is displayed. Below it, "Institution 2" is written. A horizontal line separates this header from the main content area. In the center, two gray boxes labeled "A" and "B" are positioned side-by-side. Below the line, the labels "Conference Name" and "Institution" are aligned under box "A", while "Conference Dates" is aligned under box "B". To the right of the "Conference Dates" label, there is a small gray box containing the letter "C".

Conference Name	Institution	Conference Dates
	Institution 2	A B
		C

+

Speaker 3

Institution 3

The diagram shows Speaker 3 with two institutional affiliations, A and B, represented by gray boxes with diagonal lines. Below these boxes is a horizontal line. Under the line, the text 'Conference Name' is aligned with box A, 'Institution' is aligned with box B, and 'Conference Dates' is aligned with a small gray box labeled 'C' on the right.

Speaker 5

Institution 5

The diagram shows Speaker 5 with two institutional affiliations, A and B, represented by boxes. Below these is a horizontal line with three labels: 'Conference Name', 'Institution', and 'Conference Dates'. A small box labeled 'C' is positioned at the bottom right of the diagram.

Institution 5

Conference Dates		C

The diagram shows a presentation structure for Speaker 6. At the top is the title "Speaker 6". Below it is the subtitle "Institution 6". A horizontal line separates the title/subtitle from the content. Below the line are three boxes: a large box labeled "A", a smaller box labeled "B", and a small box labeled "C". Box "A" is positioned above the text "Conference Name", box "B" is above "Institution", and box "C" is above "Conference Dates".

The diagram illustrates the data structure for a participant. At the top, a plus sign (+) is shown. Below it, the text "Participant 1" is displayed. Underneath "Participant 1", the text "Institution 1" is shown. Below "Institution 1", there are two gray boxes labeled "A" and "B". Below these boxes, there is a horizontal line. Under the line, the text "Conference Name" is shown. Below "Conference Name", the text "Institution" is shown. Below "Institution", the text "Conference Dates" is shown. To the right of "Conference Dates", there is a gray box labeled "C".

Participant 4

Institution 4

The diagram illustrates the data structure for Participant 4. It features a horizontal line with three labels below it: 'Conference Name', 'Institution', and 'Conference Dates'. Above this line, there are two gray rectangular boxes labeled 'A' and 'B', and a third gray rectangular box labeled 'C' positioned below the 'Conference Dates' label. The boxes 'A' and 'B' are connected by a horizontal line, suggesting they represent a single entity or a sequence of data points.

Conference Dates			C

$$+ \quad \quad \quad +$$

The diagram illustrates the data structure for a participant. At the top, the text "Participant 5" is displayed. Below it, "Institution 5" is shown. A horizontal line represents the data row, with two boxes labeled "A" and "B" positioned above it. Below the line, the labels "Conference Name", "Institution", and "Conference Dates" are listed. A box labeled "C" is positioned to the right of these labels, indicating a specific data point or attribute.

The diagram shows two adjacent squares, labeled A and B, representing the initial state of the system. Each square is divided into four quadrants by a horizontal and vertical line. The top-left and bottom-right quadrants of each square are shaded gray, while the top-right and bottom-left quadrants are white. This represents a checkerboard pattern of alternating high and low values.

The diagram illustrates the information structure for a participant, labeled "Participant 6". The participant is associated with "Institution 6". There are two nodes, A and B, representing different pieces of information. Node A is connected to the participant and node B. Node B is connected to the participant and node C. The information structure is summarized in the following table:

Information	Participant 6	Institution 6	Node A	Node B	Node C
Conference Name					
Institution					
Conference Dates					

The diagram shows two adjacent squares, labeled A and B, representing the initial state of the system. Each square is divided into four quadrants by a horizontal and vertical line. The top-left and bottom-right quadrants of each square are shaded gray, while the top-right and bottom-left quadrants are white. This represents a checkerboard pattern of alternating high and low values.

Participant 8

Institution 8

The diagram illustrates the data structure for Participant 8. At the top, the text "Participant 8" is centered. Below it, "Institution 8" is also centered. A horizontal line spans the width of the diagram. Below this line, on the left, are the labels "Conference Name", "Institution", and "Conference Dates" stacked vertically. To the right of these labels, there are three gray boxes with black outlines. The first box, labeled "A", is positioned above "Conference Name". The second box, labeled "B", is positioned above "Institution". The third box, labeled "C", is positioned above "Conference Dates".

The diagram illustrates the data structure for a participant. At the top, the text "Participant 9" is displayed. Below it, "Institution 9" is shown. A horizontal line represents the data row, with two boxes labeled "A" and "B" positioned above it. Below the line, the labels "Conference Name", "Institution", and "Conference Dates" are listed. A box labeled "C" is positioned to the right of these labels, indicating a specific data point or attribute.

Participant 10

Institution 10

The diagram illustrates the data structure for Participant 10. At the top, the text 'Participant 10' is displayed in a large, bold, black font. Below it, 'Institution 10' is written in a smaller black font. A horizontal line represents the data row. Above this line, two gray rectangular boxes with diagonal lines are labeled 'A' and 'B'. Below the line, the text 'Conference Name', 'Institution', and 'Conference Dates' is listed. To the right of this text, a gray rectangular box with diagonal lines is labeled 'C'.

The diagram shows two adjacent square blocks, labeled A and B, resting on a horizontal surface. Block A is on the left and block B is on the right. They are in direct contact with each other.

Participant 11

Institution 11

The diagram illustrates the data structure for Participant 11. At the top, the text "Participant 11" is displayed in a large, bold, black font. Below it, "Institution 11" is written in a smaller black font. A horizontal line represents the data row. Above this line, two gray squares with black borders and internal grid lines are positioned. The first square contains the letter "A" and the second contains the letter "B". Below the horizontal line, the labels "Conference Name", "Institution", and "Conference Dates" are listed vertically. To the right of these labels, a third gray square with a black border and internal grid lines contains the letter "C".

The diagram shows two adjacent squares, labeled A and B, representing the initial state of the puzzle. Square A is on the left and square B is on the right. Both squares are divided into four quadrants by a horizontal and vertical line. The top-left and bottom-right quadrants of each square are shaded gray, while the top-right and bottom-left quadrants are white. This represents the initial state where the top and bottom halves of each square are inverted.

The diagram illustrates the data structure for a participant. At the top, the text "Participant 12" is displayed. Below it, "Institution 12" is shown. A horizontal line represents the data row, with two boxes labeled "A" and "B" positioned above it. Below the line, the labels "Conference Name", "Institution", and "Conference Dates" are listed. A box labeled "C" is positioned to the right of these labels.

The diagram illustrates the data structure for a participant. At the top, the text "Participant 13" is displayed. Below it, "Institution 13" is shown. A horizontal line represents the data row, with two boxes labeled "A" and "B" positioned above it. Below the line, the labels "Conference Name", "Institution", and "Conference Dates" are listed. A box labeled "C" is positioned to the right of these labels.

The diagram illustrates the data structure for a participant. At the top, the text "Participant 14" is displayed. Below it, "Institution 14" is shown. A horizontal line represents the data row, with two boxes labeled "A" and "B" positioned above it. Below the line, the labels "Conference Name", "Institution", and "Conference Dates" are listed. A box labeled "C" is positioned to the right of the "Conference Dates" label.
